## WHO:S DEFINITION " HEALTHY AGEING"

---

"Healthy ageing is the process of developing and maintaining the functional ability that enables wellbeing in older age."

*report on ageing and health, WHO, 2015*

**well-being** includes the presence of positive emotions and moods (e.g., contentment, happiness), the absence of negative emotions (e.g., depression, anxiety), life satisfaction, development and activity , fulfillment and positive functioning.

3

THE REALITY LAB TESTS AND VALIDATES PRODUCTS, WORKING METHODS AND SERVICES THAT CAN CONTRIBUTE TO DEVELOPING THE ELDERLY CARE OF THE FUTURE. A UNIQUE ARENA FOR CO-CREATION BETWEEN THE ELDERLY, RELATIVES, STAFF, INNOVATORS, STUDENTS AND RESEARCHERS.

---

POSITIVE PROJECT AIM OF SPREADING KNOWLEDGE ABOUT HEALTHY AGING BY WATCHING ALL THE VIDEOS.

# Sammanfattningsvis...

- Fysisk aktivitet
- Kost
- Meningsfulla aktiviteter
- Socialt engagemang
- Korrekt medicinering
- Teknologi

# FYSISK AKTIVITET PÅ RECEPT-FAR

## Rekommendationer för dig som är vuxen (från 18 år)

- pulshöjande aktivitet på måttlig intensitet, t.ex. rask promenad minst 30 minuter 5 dagar per vecka  
**ELLER**  
 pulshöjande aktivitet på hög intensitet, t.ex. löpning: minst 20–30 minuter 3 dagar per vecka  
**OCH**
- muskelstarkande aktivitet: 8–10 styrkeövningar med 8–12 repetitioner 2 dagar per vecka  
**OCH**
- träna balans om du är över 65 år  
**OCH**
- undvik långvarigt stillasittande

Du kan kombinera pulshöjande aktivitet på måttlig intensitet (din andning ökar och du blir lite varm) och hög intensitet (din andning ökar ordentligt och du blir svettig) under veckan. Aktiviteterna kan delas upp i kortare pass än 30 minuter, som till exempel 10-minuterspass. Om du har stillasittande arbete eller sitter mycket på fritiden är det bra med regelbundna korta pauser "ben-sträckare" med någon form av muskelaktivitet under några minuter.

All rörelse (fysisk aktivitet) bidrar till bättre hälsa och mer rörelse ger större effekt!

## Fysisk aktivitet på recept – FaR

Du kan få ett FaR som en del av din behandling. Vad du ska göra, hur mycket och hur ofta, kommer du och den som skriver ut receptet överens om. Här kan du få tips om olika aktiviteter: [www.FaRledare.se](http://www.FaRledare.se)

### Hälsosam fysisk aktivitet

| Öka                | Byt  | Minska  |
|--------------------|--|---|
| Vardagsaktiviteten | Rulltrappa ► Trappa<br>Hiss                            | Bilåkande   |
| Konditionen        | Bil ► Allmänna kommunikationer<br>Cykel<br>Gå          | TV-tittande   |
| Muskelstyrkan      | Sittande ► Regelbundna bensträckare<br>Muskelaktivitet | Skärmtid<br>Tid i stillasittande – sitt helst inte mer än 30 minuter i sträck |
| Balansen           |  |   |

and outdoors on the cellular network  
 even if the person loses consciousness or cannot move  
 staff crucial information about how the person was lying after a fall, an  
 cancel false alerts before they are sent  
 e confidence to keep active by reducing the fear of falling

## FEATURES

The SafeTrx Care app on the mSafety wearable is remotely configurable to adapt to each case

iOS and Android versions of the SafeTrx Care app also available

Discreet activity detection, step counting, sleep, energy expenditure, heart rate, heart rate variability (rMSSD) and location tracking options

Integration with wearable BLE accessories such as SpO2, blood pressure and fall prevention sensors

SafeTrx Smart Home connects to major IoT platforms such as Samsung SmartThings and Alexa

Integrated automatic fall detection and alerting

[Learn more about SafeTrx fall detection, in conjunction with industry leaders, Infonomy.](#)

SafeTrx C2 rules-based dashboards, alerts and two-way messaging

Secure end to end communication

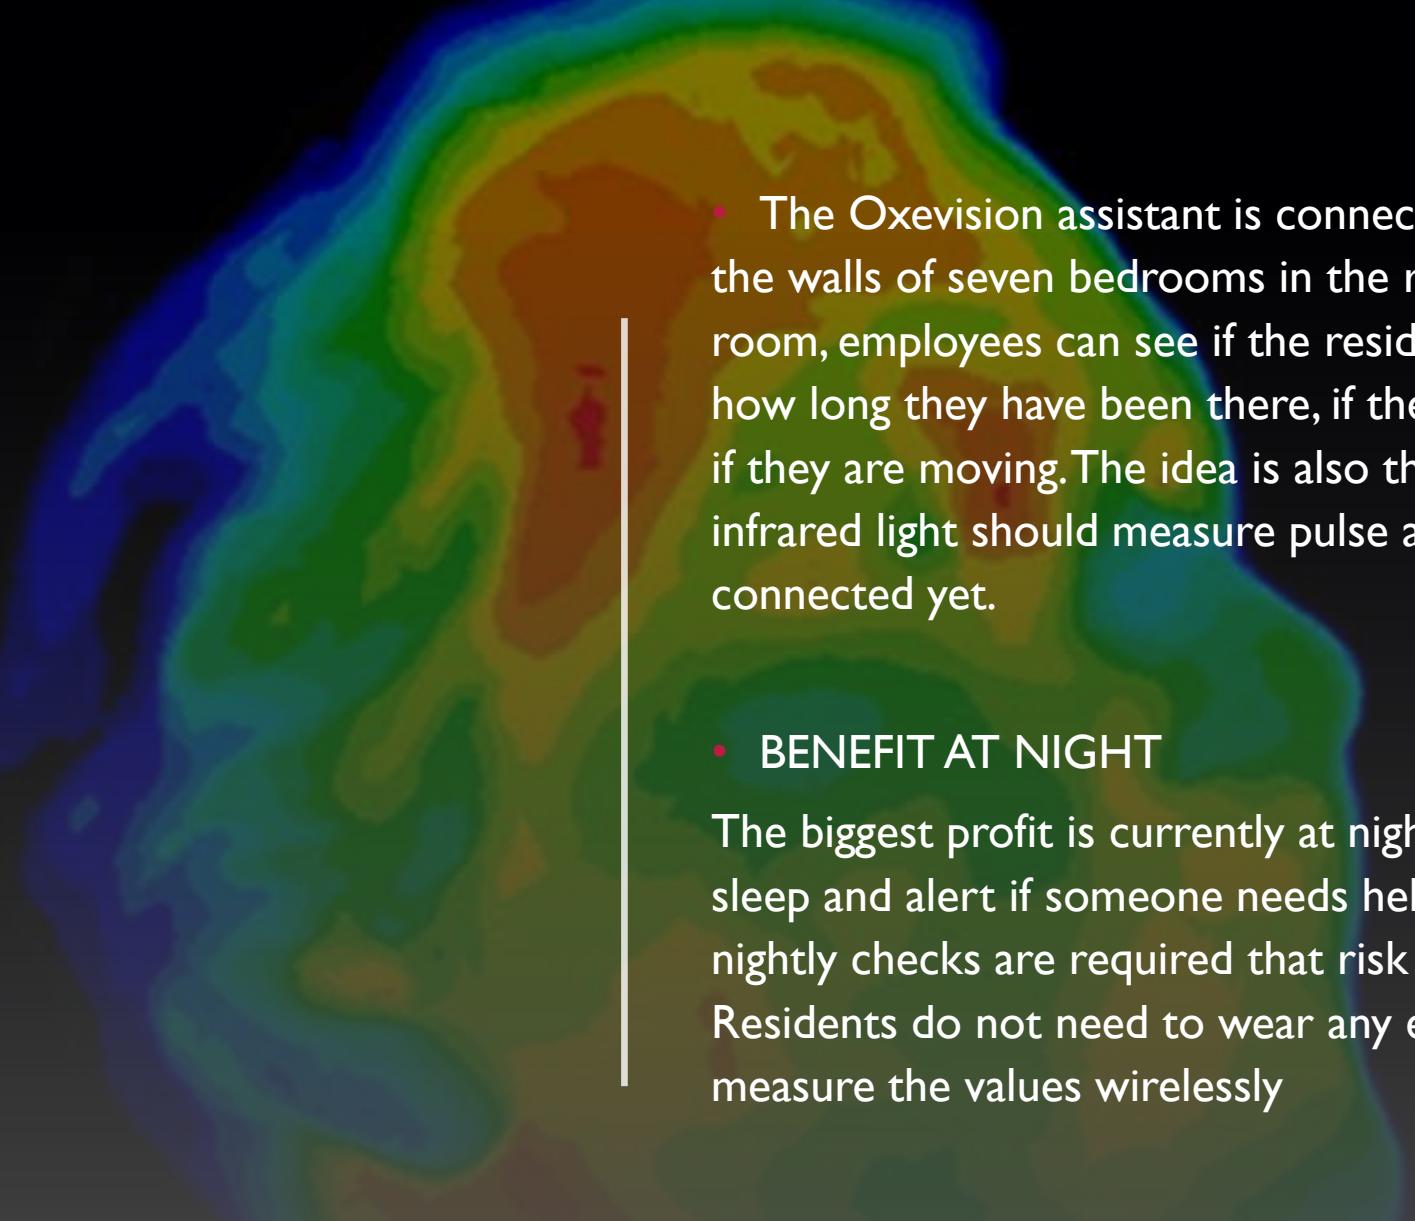

Cloud based and on-prem deployment options

## 28 GPS-ALARM ( CE MARK)

---

- When They Wander, You'll Never Wonder

- The Oxevision assistant is connected to sensors installed on the walls of seven bedrooms in the residence. From the staff room, employees can see if the residents are in their rooms, how long they have been there, if they are asleep or awake and if they are moving. The idea is also that the sensors with infrared light should measure pulse and breathing, but it is not connected yet.

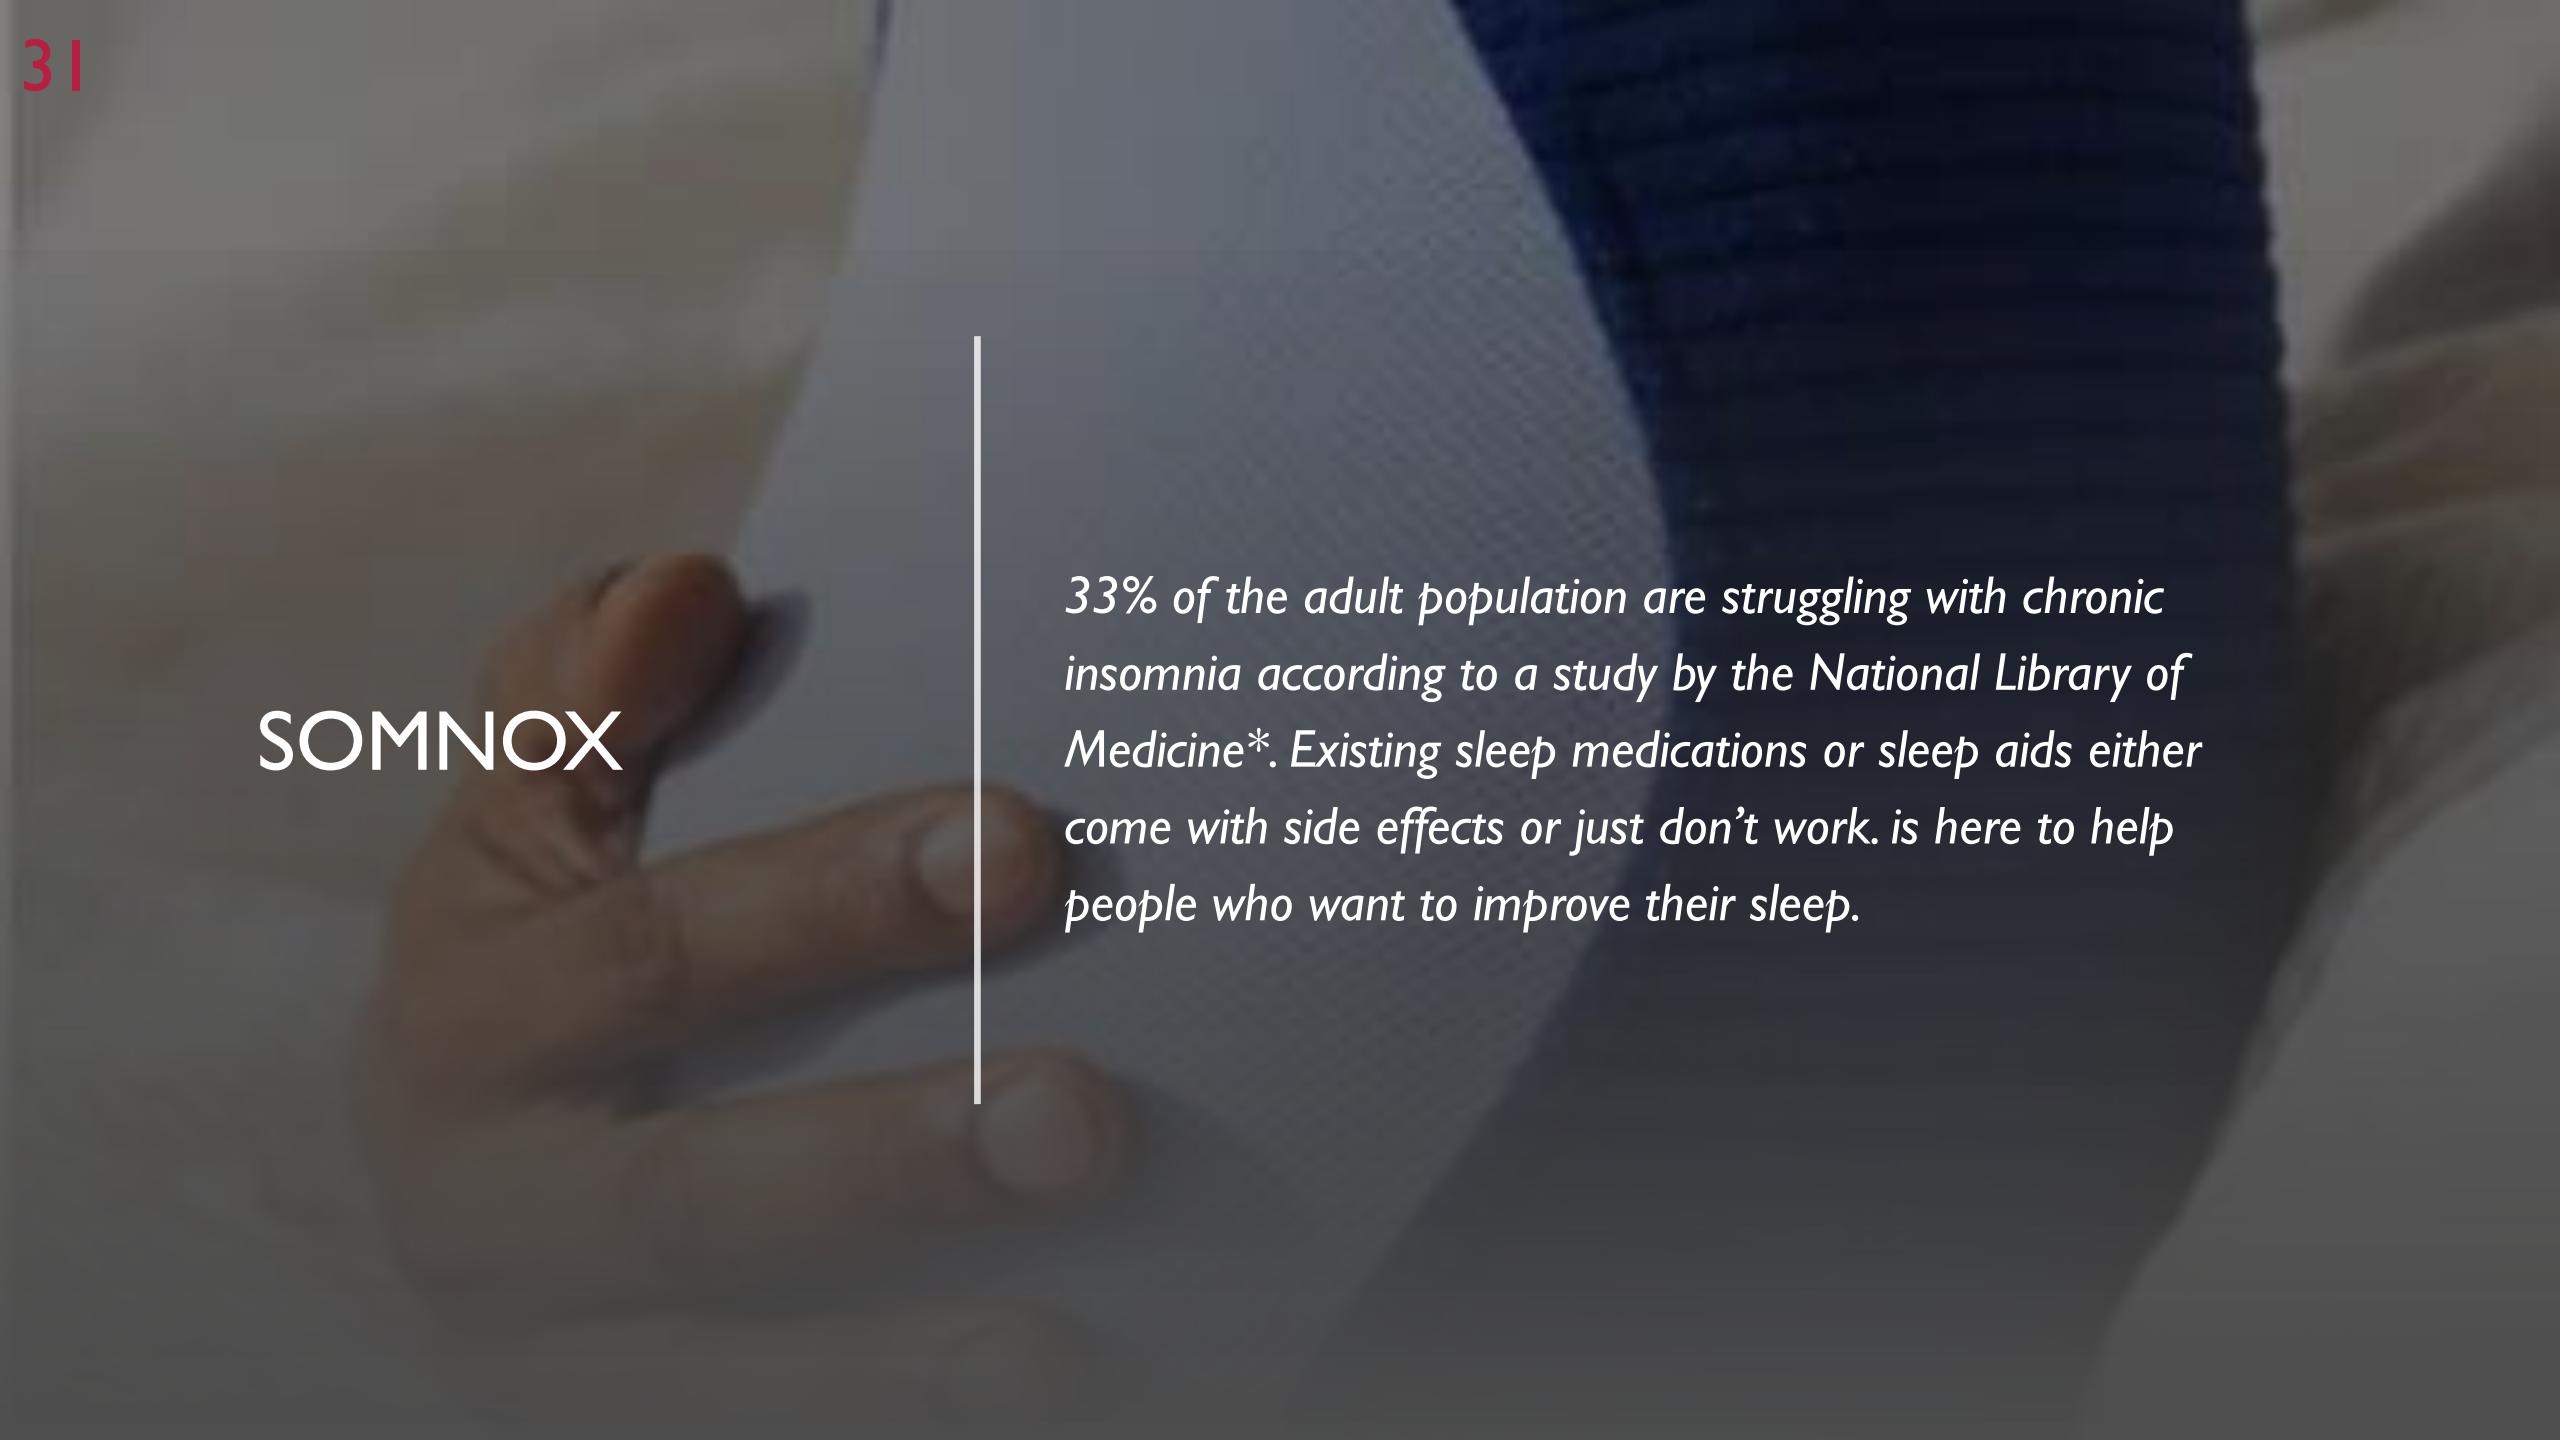

- **BENEFIT AT NIGHT**

The biggest profit is currently at night. As the sensors register sleep and alert if someone needs help or falls out of bed, no nightly checks are required that risk waking the residents. Residents do not need to wear any equipment, as sensors measure the values wirelessly

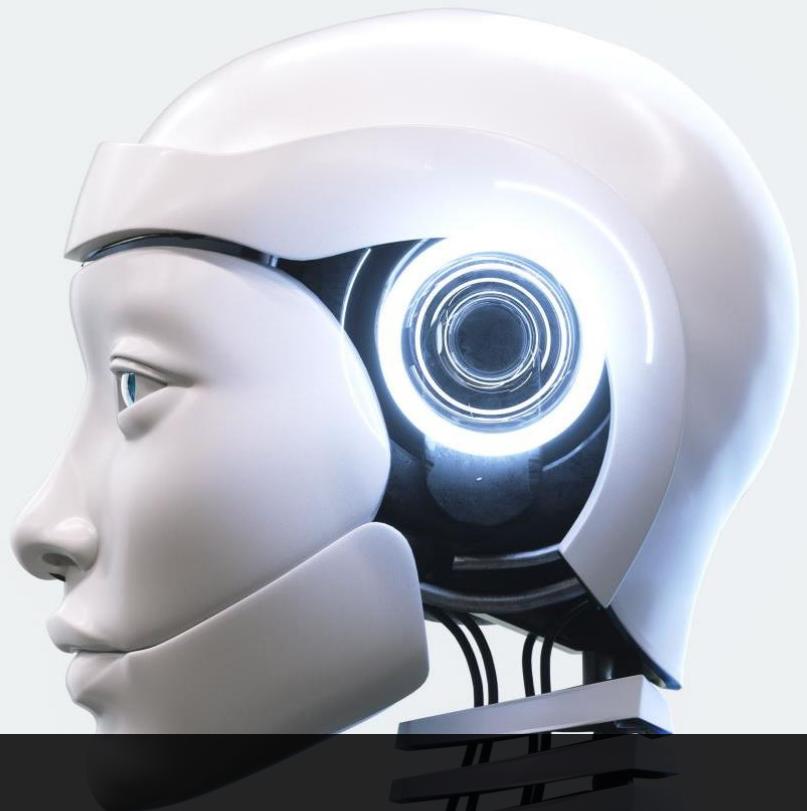

PU SENSOR -PRESSURE ULCER  
PREDICTION /

A person is sleeping peacefully in bed, viewed from the side. The person is wearing a white t-shirt and dark pants. The background is a dark, out-of-focus room.

SOMNOX

*33% of the adult population are struggling with chronic insomnia according to a study by the National Library of Medicine\*. Existing sleep medications or sleep aids either come with side effects or just don't work. is here to help people who want to improve their sleep.*

VoiceRPM digital assistant improves the efficiency and efficacy of caregivers' scheduled visits and check-ups and sends customizable text alerts and daily reports directly to the care team.

<https://checkhealth.se/voicerpm/>

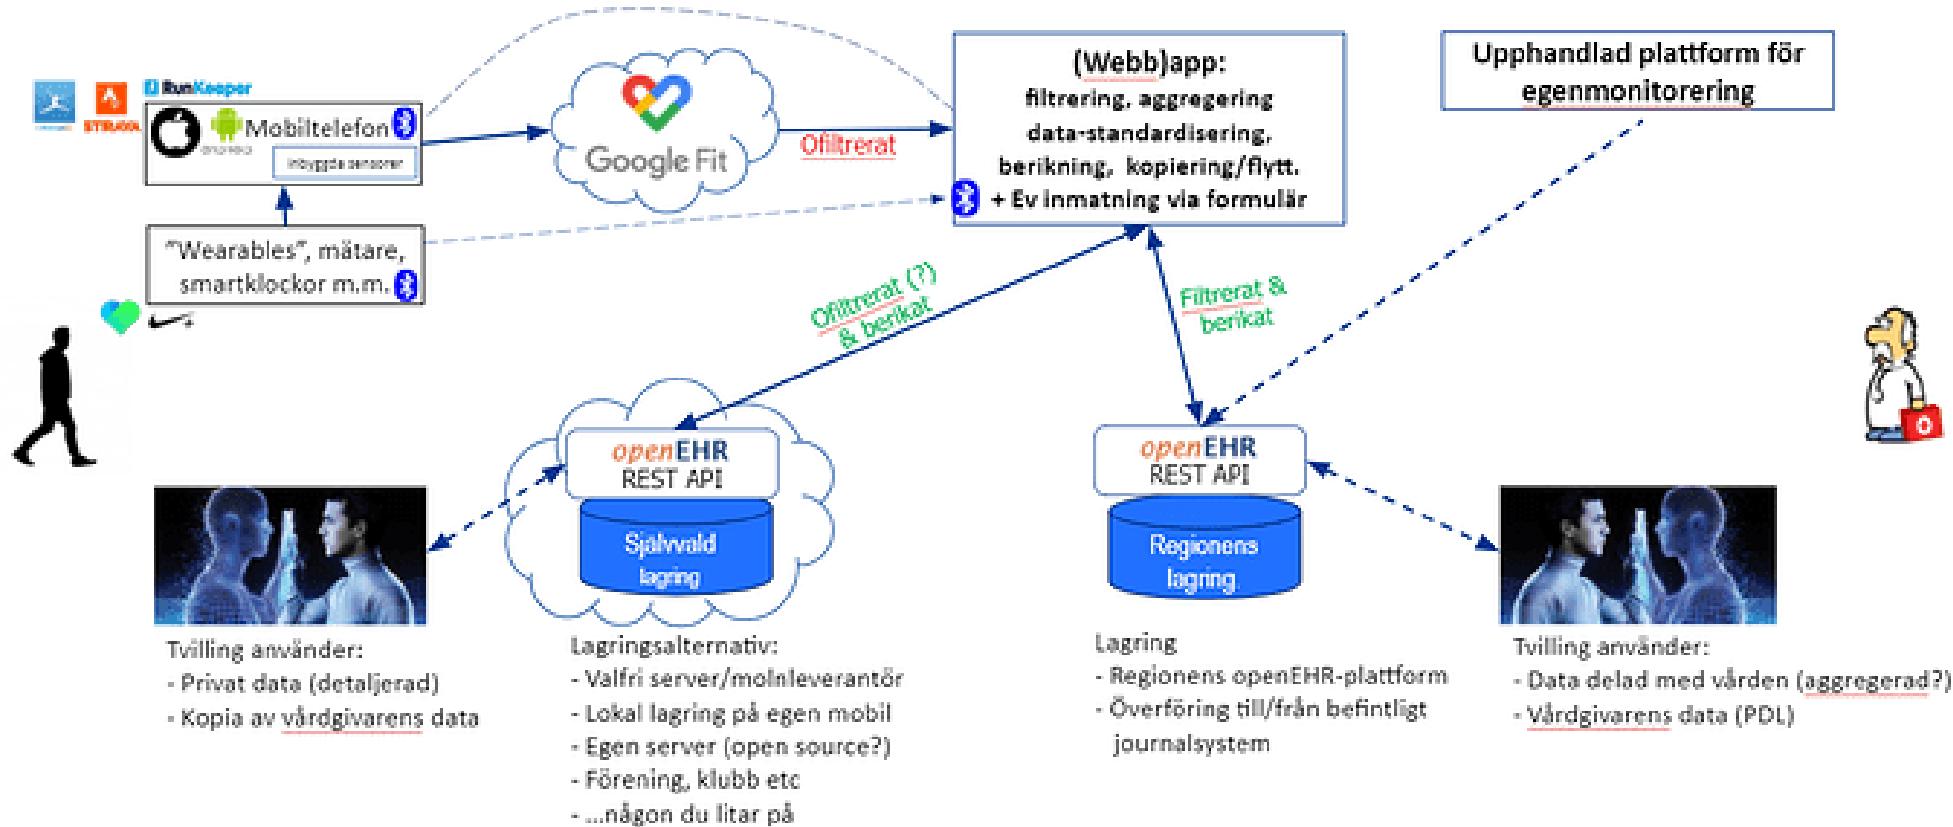

## Usage in the "health conversation"

- A Swedish study, originally done in Västerbotten, in Sweden
- All people turning 40, 50, and 60, are called in for an extensive examination, followed by an open-ended health-conversation
- Survival rates have since improved by several years, risk of CVD reduced > 50%, etc. ***Prevention effect!***
- We want to ***magnify this effect***, by also giving patients access to their digital twin
- The hope is to see ***more preventive measures, a higher compliance*** to treatments, better patient-doctor ***communication***, a better way to ***integrate versatile data*** sources, etc
